Technical Bulletin

Product:

Standard Bracket Mount - Intermediate Part #: 640154

Scope:

The introduction of a universally adjustable bracket to replace the discontinued suspended mount.

Description: A stainless steel mounting bracket designed to mount LS/TD/WL product in an interior or exterior application. This bracket will retain the adjustability of the short and tall mounts only at an intermediate height that positions the light at the same height as the old suspended mount.

The product is 304 stainless with a TGIC thin film polyester powder coat paint. It attaches in the same manner as the others and is fully adjustable along the pitch axis.

A left hand and a right hand bracket are included as a kit.

Projected Availability Date:

Standard Bracket - Intermediate Part #: 640154 - July 25, 2003
